

Milos Vasic

Senior Software Engineer — SDK & Platform Engineering

Belgrade, Serbia ⇌ Dubna, Russian Federation Email: i@mvasic.ru · Phone: +381 69 25 35 718 · +7 966 323 77 17 GitHub: github.com/milos85vasic · Web: <https://milosvasic.ru> Spoken languages: Serbian (native), English (C2), Russian (basic)

SUMMARY

Software engineer with 16+ years of professional experience (since 2009) across the full software development lifecycle — planning, development, team leadership, and deployment. Deep specialization in SDK and platform engineering for mobile, backend, desktop, and web. Proven record delivering stable, high-performance, developer-facing software for enterprise customers and partners including AWS, Google, Bosch, and Leica Geosystems. Author of the book *Fundamental Kotlin*, and creator of 240+ open-source repositories across five organizations.

WHY HIRE ME — STRENGTHS

- **True multi-stack engineer.** Android/Kotlin and C++ are my core, but I ship production code just as confidently in Go, Swift, Java, Dart, Python, Ruby, and TypeScript — across mobile, backend, desktop, and web. My public repositories prove this breadth: Go services (HelixTranslate, Catalogizer, LLMsVerifier, Panoptic), Kotlin apps (ShareConnect, Android-Toolkit), and Flutter (GrabTube).
- **Architect of platforms, not just features.** I design SDKs and frameworks that other engineers build on — stable public APIs, strong testing, clear docs, predictable performance. HelixTrack (open-source JIRA alternative) and HelixCode (distributed multi-LLM development platform) are full products, not demos.
- **Quality is measurable, not asserted.** I build under a strict “no-shortcuts, fully-tested” standard and even build the tools that enforce it: LLMsVerifier (LLM benchmarking/verification) and Panoptic (cross-platform automated UI testing).
- **Owns the whole lifecycle.** The Server Factory suite (e.g. Mail Server Factory) provisions complete, hardened infrastructure declaratively — I am comfortable from first commit to production deployment and operations.
- **Communicator and author.** I wrote *Fundamental Kotlin* (3rd edition) and authored for Packt Publishing UK; I document thoroughly and mentor gladly.

CORE SKILLS

- Mobile: Android, Kotlin, Java, Jetpack Compose, Kotlin Multiplatform, Coroutines/Flow, Retrofit/OkHttp, Dagger/Hilt; React Native, Expo; iOS (Swift, SwiftUI); Flutter (Dart)
- Backend: Go (Gin), Kotlin/Java (Spring Boot), Python (Flask/Pyramid), Ruby on Rails, C++ (Drogon), Docker/Compose
- Desktop: C++ (Qt, CMake/Ninja), Electron, Kotlin Multiplatform, Java (Swing/JavaFX), macOS (Swift)
- Web: React, Angular, TypeScript/JavaScript, HTML, CSS
- Data: PostgreSQL, MySQL, SQLite, MongoDB, Redis, Firebase, Apache Kafka, RabbitMQ

- Practices & tooling: REST, WebSockets, gRPC, SIP, Matrix, QUIC; CI/CD (GitHub Actions, Jenkins, CircleCI, Harness); Git; SonarQube; AI-assisted development

PROFESSIONAL EXPERIENCE

SDK Developer — Harness (Belgrade, Serbia) | Mar 2020 – Dec 2024

Led development of the Feature Flag SDK family across all major platforms (Android, iOS, Flutter, React Native, TypeScript/JavaScript, Java, Kotlin, Swift, Go, Ruby). Delivered and maintained production SDKs reaching millions of deployments for enterprise customers and partners including AWS and Google.

Software Engineer — Leica Geosystems (Heerbrugg, Switzerland) | Feb 2016 – Feb 2020

Built real-time iOS and Android software for Leica's next-generation 3D laser scanners: low-level hardware communication, real-time point-cloud processing, and synchronization. Collaborated with partners including Autodesk.

Lead SDK Developer — Bosch (Belgrade, Serbia) | Jan 2010 – Jan 2016

Led the Connected Vehicles SDK: real-time Bluetooth communication over the OBD-II bus, with high-performance data acquisition, signal processing, and on-device persistence.

Selected part-time / contract engagements

- TN-TECH (Novi Sad, Serbia), from 2017 — Android/Kotlin/C++/Qt; products including Globex Data's Sekur secure-communication suite (SekurMessenger, SekurMail, SekurSuite) and the BusRide platform.
- Increment Loop (Belgrade, Serbia), from 2023 — Android/Kotlin (Yuno app).

SELECTED OPEN-SOURCE PROJECTS

- HelixTrack Core (Go) — open-source enterprise JIRA alternative for project & issue tracking. github.com/Helix-Track/Core
- HelixCode (Go) — distributed, multi-LLM AI development platform. github.com/HelixDevelopment/HelixCode
- HelixTranslate (Go) — universal ebook translation toolkit (REST + HTTP/3, real-time WebSocket). github.com/HelixDevelopment/HelixTranslate
- LLMsVerifier (Go) — systematic LLM benchmarking and verification platform. github.com/vasic-digital/LLMsVerifier
- Catalogizer (Go) — advanced multi-protocol media collection management. github.com/vasic-digital/Catalogizer
- Mail Server Factory (Shell/Kotlin) — declarative, hardened mail-server deployment across many Linux distributions. github.com/Server-Factory/Mail-Server-Factory
- Android-Toolkit (Kotlin) — reusable Android abstractions and implementations. github.com/vasic-digital/Android-Toolkit

PUBLICATIONS

- *Fundamental Kotlin* — self-published author, 3rd revised edition (2022). Also authored for Packt Publishing UK.

EDUCATION

- M.Sc., Contemporary Information Technologies — University Singidunum, Belgrade (2014)
- B.Sc., Informatics and Computing — University Singidunum, Belgrade (2008)
